

TRIP – Mosavit Wash Basins from Spain

Lead time 10-12 weeks

METAL BASINS

Style: [Metal 2 Gold](#)

The metal sinks and pedestals in our collection offer a perfect fusion of durability and contemporary design.

Metal, crafted with precision and detail, combines the robustness of a resistant material with the modern and minimalist aesthetic that defines this line of products. Each piece has been carefully designed to integrate functionality with an elegant and sophisticated appearance, ideal for bathrooms of various styles, from industrial to cutting-edge.

The corrosion resistance, ability to withstand high temperatures, and ease of cleaning make metal sinks and pedestals a perfect choice for daily use in humid environments. Additionally, their timeless design ensures that each piece remains relevant, adding modernity and functionality to any space.

NATURAL STONE BASINS

Style: [Onega and Zeolit](#)

Natural stone has been used since ancient times for its beauty, resistance, and uniqueness. Natural stone washbasins and pedestals not only offer an organic and unique aesthetic but also excellent durability. Each piece of stone has its own characteristics, making it inimitable and turning each sink into a work of natural art.

Thanks to its solidity and resistance, natural stone sinks remain impeccable over time, resisting humidity and the passage of time without losing their essence. Their rustic and elegant beauty, combined with the warmth they bring to the bathroom, makes them a perfect option for those seeking a natural, durable material full of character.

SOLID SURFACE Basins

Styles: [Stella and Cora](#)

Solid Surface material has revolutionized washbasins design, becoming the preferred choice for those seeking a modern and functional style. Made from a blend of polymer resin and ATH (aluminium trihydrate) mineral filler, these sinks offer seamless surfaces without visible joints, ensuring maximum hygiene and resistance to bacteria and fungi. Their silky finish, along with sleek shapes, adds a touch of sophistication and elegance to any bathroom.

Easy to maintain and clean, Solid Surface washbasins feature mass pigmentation, ensuring long-lasting and repairable colours. Moreover, their high resistance to abrasion and UV radiation makes them ideal for both indoor and outdoor use. With cutting-edge design and exceptional performance, Solid Surface sinks are the perfect option for those seeking beauty, functionality, and durability.

CEMENT BASINS

Style: [Toba Gris Pedestal and Thai Beige](#)

Cement has become one of the most emblematic materials of modern industrial design. Cement washbasins and pedestals offer a minimalist, robust, and contemporary aesthetic, distinguished by their clean finish and great resistance. With their unique texture and neutral colours, these sinks add a modern and sophisticated touch to any bathroom, creating an atmosphere with a cutting-edge flair.

In addition to their visual appeal, cement is a highly durable material that resists humidity, extreme temperatures, and cleaning products. Its ease of maintenance and natural resistance make it a practical and eco-friendly option, perfect for those seeking a functional design without sacrificing elegance.

CERAMIC BASINS

Style: [Dunas Grey Orange and Lara Calacatta Pedestal](#)

Ceramics have been a fundamental material in the history of interior design, known for their timeless elegance and versatility. Ceramic washbasins offer an aesthetic and functional solution for any bathroom, combining the beauty of their finishes with their

durability and resistance. Their impermeable surface, achieved through the exterior glazing, makes them an ideal option for resisting bathroom humidity, while maintaining their flawless appearance over time.

Thanks to their resistance to cleaning products and easy maintenance, ceramic washbasins remain one of the most popular and practical choices in bathroom design. Moreover, their variety of shapes, colours, and sizes allows them to adapt to any style or need, making them a reliable and elegant choice.
